sexist historical baggage that can make them difficult to achieve. It's written in a very engaging way. I laughed out loud a number of times but backs up its points up with current research. is SUCH an important and desperately needed book. New York Times contributor Kate Stone Lombardi makes the fascinating point that of all the possible parent child relationships e.g., father son, father daughter, mother daughter, the most circumspect and maligned is that of the mother and son. This was an illuminating beginning to this book. Close mother son relationships are abundant, but they are kept in the closet. While fathers are lauded for teaching their daughters traditionally masculine tasks or skills, mothers are shamed for doing the same thing for example, teaching a son to knit or just talk openly about his feelings. Lombardi interviewed over 1,000 moms online and in person. She found that nearly nine in ten moms described themselves as extremely close or very close to their sons. And the result of these close relationships is that we are creating a generation of boys who will become strong, loving spouses and partners, with a higher level of sensitivity and emotional intelligence. As Lombardi notes, A new and growing body of scientific literature shows that sons who are close to their mothers are emotionally and physically healthier than those who are not. She writes of stereotypes about boys and girls and how some mothers long for daughters so they can develop close relationships with them. In some cases like mine, feminists look forward to raising strong women who have opportunities they or their mothers did not have. As one mom said, When it came time to have children, what I had in mind were daughters. All of my feminist friends laughed, Look at the hand you were dealt. I had to process that loss I had daughter envy. Why do women assume that girls will be emotionally available than boys. We make assumptions that boys will grow apart from their mothers, based on culturally acceptable mother son norms. Mothers battle not only cultural expectations of how they relate to their sons, but also sometimes their own husbands or family members. Some women shared examples of their husbands accusing them of babying their sons if they showed any affection, even at very young ages, and one woman told a story about a power struggle with her husband about her nearly two year old son's curly hair. She told him she'd cut his curls when he turned two,

but a month before he turned two, her husband cut off all the boy's curls while he was taking a bath. He thought I was turning his boy into a girl. Mothers are criticized for hugging their teen sons or touching them at all. Then there's the nosy strangers who think they know best and think that mothers are scarring their boys for life if they allow them to wear a girl's Halloween costume. She cites the work of artist JeongMee Yoon, who has a project with side-by-side images of actual girls and boys rooms, entirely in pink and blue. It's incredibly sad and also another good example of why it's good I have boys. I am no fan of pink. Lombardi delves into the origin of Freud's Oedipal theories and the hidden fears of homophobia inherent in this bullying of moms and sons. Mothers involved in their sons' lives are made into the villains in popular culture, at best think Psycho, and at worst are thought to create sissies, Mama's boys, or overly dependent and feminine. She talks about the boy crisis and some prominent authors' views that boys need to disconnect from their mothers and instead form stronger relationships with their fathers, instead of recognizing the need for both father and mother bonds. Well-known author Michael Gurian argues that mothers' apron strings are strangling the manhood out of boys. It's all the mother's fault, of course. In a fairly well-known parenting book, *Get Out of My Life, but Please Could You Drive Me and Cheryl to the Mall* by Anthony E. Wolf, the author talks about the problem of mommy, which he defines as the theory that adolescent boys' strong feelings for their mother might be tinged with sexuality and might therefore become really unacceptable. Why is that mothers' close relationships with their sons are often described as sexual? Thank you, Mr. Freud. Since when do people say that teen girls have crushes on their fathers if they feel close to them? Lombardi points out that we never see mother-son dances, but only father-daughter ones because no one ascribes anything sinister to that relationship. However, as a brochure for a North Carolina father-daughter dance said, Every father needs to date their daughter, and every daughter needs an example of how a young lady is to be treated by a man. This dating analogy is creepy because sexual abuse in families is much more likely to occur between a father and a daughter. Incest between mother and son is exceedingly rare; female perpetrators are between 1 and 4 percent of all sex abuse.

cases So why is that relationship such taboo When boys reach a certain age, they are often embarrassed to be seen alone in public with their mom or to talk about close relationships with their mothers It s really only the big, tough football players or otherwise macho men who are allowed to get away with close relationships with their mothers. Then there are the men and women who play into the idea that feminism or stronger women s roles are creating weak men Lombardi mentions the book Manning Up How the Rise of Women Has Turned Men Into Boys Although author Kay Hymowitz notes that it s important for young men to have strong relationships with both their moms and dads, the title makes it sound like weak men are all the women s fault Lombardi notes that she agrees that this can be a confusing time to be a young man, but mothers play an important role in helping their sons through this transition by giving them the skills they need to help them mature and succeed in school and in the workplace As she concludes, Why on earth would women want to do anything to harm men We are the mothers of sons Gradually, our culture will find mother son relationships acceptable The younger generation will see that this changes In 2011, many of the Academy award nominated films featured difficult mothers The Fighter, Black Swan, and The King s Speech In the acceptance speeches, however, many of the winners thanked and paid tribute to their moms Tom Hooper, who won best director for The King s Speech, thanked his mother for giving him the idea for the movie The moral of the story is, he said, Listen to your mother I confess that I always imagined having a daughter, but I am so thankful to have sons Although many women idealize mother daughter relationships, I ve observed that in many cases, these relationships can be strained or not meet expectations Daughters can be very hard on their mothers This book affirms that I can have truly deep relationships with my sons, and they will be better prepared for adulthood because of our strong mother son relationships It also made me feel incredibly grateful to be a parenting partner with a man who affirms my close relationships with my sons and 1 is not afraid to share his sensitive, emotional side, and is just as likely as I am to be brought to tears during a touching moment, and 2 never tells me I need to toughen the boys up or worries about them not acting manly enough It also made me feel thankful for all the

wonderful men I know, including my dad, brother, brother in law, and many male friends, who build strong relationships with boys and support women in doing the same I strongly recommend this book for anyone who has a son or works with boys.
