cameron stewart was a highschool football star, who was on his way to win a state championship but he got sick the week before and wasnt able to go but life took a turn for the worst when he was kidnapped in front of his own home the story is very exciting as it takes you on a journey through his life as he tries to make it home this book is very addictive, and i recommend it to anyone who likes nonstop action and a lot of twist and turns in a story. Cameron is kidnapped for no apparent reason The rest of the story follows his escape from his captors, his journey home and the real reason behind the mysterious circumstances he finds himself in. A fairly suspenseful crime thriller The short chapters keep the book moving at a decent pace and it does a fairly good job of keeping your attention But because it s a young adult book it probably doesn t go into any greater depths than I would have liked. One thing I didn t really like was the overuse of filler words during dialogue, like , kind of and guy being the main offenders I understand that this is aimed at teens, the main characters are teens and the story is set in the US, so sure, slang, colloquialisms etc., make the dialogue realistic, but overusing them becomes annoying, breaks the flow of the dialogue at times and, in my opinion slightly patronising I was almost anticipating the use of hella , but I guess the author didn t know this slang word existed On a positive note I m glad that the dialogue wasn t too mature , otherwise it might have turned into something comparable to a Diablo Cody script. The book itself describes the story as a high concept thriller with a touch of 24 and The O.C Pretty much correct, although it could have

done with a little ²⁴ and a little less of The O.C. With an attention grabbing storyline and sassy characters, this book is one I'd read again. The storyline itself is easy to follow, but not to the point where it is dull. In fact, it's anything but. I mean, how can a story be dull when a kidnapping, an escape, and a murder all occur within the first 5 chapters? There weren't many parts that were boring, it really did a good job at holding my attention. The characters were really something. It seems like there is a little of every personality type known spread out through every character, whether it be evil, good, kind, rude, or just down right wierd. Yet it doesn't go overboard with them. There aren't really any that are totally unnecessary, unlike other books I've read. One of the few flaws I've noticed with this book, is that the narration can be a little stale at times. There are a few points throughout the book in which it goes less into telling a story, and into just describing an occurrence. It didn't go into much detail, but just told what all happened. This led to a few points in which I felt like I was reading a report, rather than a novel. But other than that, there really isn't much to say other than it's worth reading. It may have its flaws, but it's not a book to pass up. Give it a whirl if you can.

Level 3 Question

In the beginning of the story, Cam kills a man so he can escape his kidnappers. While he did technically commit murder, it was only for his survival and safety. Is murder justifiable?

A young boy living in Los Angeles, California is one day mysteriously kidnapped. Cam is a part of a rather wealthy family and is well known to many people. One day he goes out for a drive that turns into a car wreck and he wakes up in a room with nothing, not even shoes. When Cameron finally fakes a bathroom emergency he quickly thinks of a plan that leads to the death of the guard who was supposed to be watching him. Not thinking, Cam starts to run through the empty house, hoping not to run into any bad guys. Successfully he makes it out the door and down the long, dark, cold driveway that led to the mysterious mansion he just escaped. After killing someone and running away from his mysterious kidnappers, Cam is very hesitant in finding out that he is all the way up in Washington. Coincidentally some police were notified of a robbery nearby, and mistake Cam for their criminal. Not thinking clearly once again Cam runs making it seem as if he actually did something wrong on purpose. After hours of running he finds a safe way home with a

couple of new friends. Once he gets back to L.A he finally makes it home safely but is being closely watched until they find out the reason he was kidnapped in the first place This book was really good, it was full of action and mystery I personally did not learn anything from this book that would help me in the future It was just a fun book that literally keeps you on the edge of your seat until you're done. I am a person that doesn't find reading very interesting and sometimes even boring But Zoo was different than any book I've read recently It had a lot of action and plot that was easy to follow, but also the right mix of detail about characters that flowed with the actual story The book's theme that I picked up was sometimes you're put in situations where it's just you, no one to help You rely on yourself and what people have taught you to get by Even survive The story starts with Cam main character waking up to find that he was kidnapped and finds his way out by using a arisol can and a couple kicks to escape Just one example of Cam using his surroundings to get out of a hard situation He gets by just enough because of his instincts I really enjoyed reading Zoo and love this kind of Action pact style of writing Hopefully I can find other that are of the same genre. I would recommend this book, even if reading isn't on the top of your list. Zoo was an amazing book in my opinion The author does an amazing job of transitioning and keeping the reader informed even though the book is so full of non stop action Cameron Stewart is a well off kid who was going to play in his school's state championship football game But everything takes a turn for the worse when he is t boned, kidnapped and drugged by a mysterious group of people He wakes up to find that his only way to get out is to knockout the guard but after he executes his plan he realizes that the guard is dead and the only thing he can do is run away The story takes an evenmysterious twist when he finds out there is a chip in his arm after he was shot that could've only been planted by his parents And the only thing he can ask himself is who can he depend on now, when everyone seems to be out against him I would sincerely recommend this book to anyone who likes a book with a lot of twists and wants to try and figure out what they're really after from Camerons father. This book has very good detail and makes the reader want to
keep on reading I m not normally someone to read books but
this book was pretty dang good The book was way better than
expected The title is kind of misleading because the book has
nothing to do with a zoo This book takes place on the east
coast of the U.S in California and Oregon Cam is a kid who
gets kidnapped and is trying to make his way home but then
realizes that home is not the safer place He hitches a ride with
some people and lives with them for a couple of weeks Cam is
a real fast and good problem solver This book has a great story
line The author is rather creative and puts a good picture in the
readers mind I recommend this book to anyone that likes

mystery and action books If you have the opportunity to read this book, read it What I liked most about the book is all the action and suspense that came with all the imagery, it all just mixes together in a great way for a good action book in my opinion However there are some things I really didn't like about the book too like the ending it really could have had a better one than the one it has now There were also some memorable parts of the book that just really stood out to me like when Mark said I could feel my blood pumping rapidly, I felt really groggy like if my head had just been hammered on page 23 paragraph 2 because this kind of gives you a picture of what he's feeling after waking up in a room after getting kidnapped If you were kidnapped and woke up in a room hooked up on all kinds of meds how would you react would you panic, or play it cool and be calm A One thing I liked about Zoo by Graham Marks is how it makes the reader feel involved I really liked how my heart rate would speed up when something happened that's really exciting, or when something creepy is going on in the book and you can feel that pit in your stomach I think every student should read this book if they like to read or don't like to read B The only thing I didn't like about this book was how every other chapter would drag out and nothing interesting would happen C Everything you can imagine is real I find this quote to be important because it is very true and there is no denying it. D If you were to wake up and find out that you have been kidnapped, how would you react
