Reviewed for queuemyreview.com book release

Aug08When Harlequin first came out with their NASCAR series, I wondered how long it would last Well, it s been going strong for two years now and doesn t appear to be losing any gas pun intended According to NASCAR statistics, about 30 million of their fans are women So I m guessing this venture is proving profitable for both parties and I must admit that I ve enjoyed the NASCAR stories I ve read so far My latest from this series is Overheated by Barbara Dunlop.Crystal s a NASCAR fan by proximity mostly Although her parents and their company do machining for the different crews, she s just an underpaid and overworked truck driver and delivery person She s had to fight the prejudices that come with her model looks all her life, so when a stranger tries to help her lift her latest delivery to the pits, she s not exactly welcoming She s secretly amused, but outwardly aloof Turns out he s part of a well known racing family, but not involved in racing himself In fact, he looks like a businessman, but is actually a rocket scientist mathematician Who knew geek could look so good As for Larry, he s suddenly realizing that his genius IQ doesn t seem to be able to force his brain to process correctly when Crystal s around The time they spend together, the he s attracted to her and vice versa But he s 22 years older than she is Heck, his son is older than she is But when the solution is love, what do numbers have to do with the equation There are a lot of issues packed into this 250ish page novel abandoned pets, age differences, single parenthood, financial burdens, death of a spouse, current space theory, and public family opinions While the author doesn t preach on any of them, she does provide some interesting viewpoints that might make you ponder the subject a bit I enjoyed the fact that the focus of the novel wasn t a driver or mechanic or owner Seems like most of the NASCAR series novels I ve read featured one of

Afterlife

After the Kiss

those and I found it refreshing that this one did not Her characters dealt with their issues in a relatively realistic manner, even if their incredibly good luck is something I d love to have The love scenes were very tame and I wouldn t have any problems letting a teen read this one, but the tension was still there.In all, I enjoyed reading Overheated My only complaint would be the almost too neat solutions to most of the couple s problems I saw it coming VERY early on and wasn t particularly surprised by the ending But if you re a fan of a softer, sweeter romance with a hint of speed, then this latest by Barbara Dunlop should grease your wheels

My first NASCAR romance Pretty good may december story The age difference here is 22 years The heroine is 28 and the hero is 50 I enjoyed that the story involved difficulties revolving around their age difference Their families did not approve The ending was a bit facile but not so much that it impaired my enjoyment of the story The NASCAR element was not overwhelming So if you re like me and all you know about car racing is that they go around in a circle and occasionally crash, you won t be lost in the details I particularly enjoyed the serendipitous story concerning Rufus, the dog But really, why are so many dogs named Rufus in stories I think heroes should be named Rufus but maybe that s because it s my husband s name And then there s Rufus Sewell Seriously hot.

Overheated by Barbara DunlopHarlequin NASCAR LibrarySecrets And Legends Series Book 9Professor Larry Grosso has buried himself in his work since his wife passed away three years ago Unlike his family that has four generations of racing in their blood he prefers solving mathematical problems rather than driving His son Steve even joined the racing world by working with his cousin, Kent When he meets the most beautiful woman ever he decides it may be time to move on with his life.Crystal Hayes hates being beautiful She d done the trophy wife thing and never wanted that again Even dressing down didn t help hide her looks When she met Larry she realized that maybe there was someone out there who could care for her beyond her beauty and even take the time to realize she had brains as well If only she can convince him that being over twenty years older than her don t matter.Love don t always make life easier Steve is sure that Crystal must be a gold digger and others tell Larry she deserves someone younger Tell their hearts that The series continues with past issues Patsy wants

her husband Dean to retire, but after trying for a championship for thirty years he s not ready to quit without it There are still past mysteries to be solved Book ten continues back with the Murphy family in Teaming Up.[http justjudysjumbles.blogspot.com](http://justjudysjumbles.blogspot.com)

I was a bit iffy whether or not I would be able to get into this story if it was NASCAR heavy but the sport just served as a backdrop to set the stage and lives of the characters than serve as a center Crystal and Larry are a cute couple and I really loved that Larry was a mathematician rocket scientist who worked for NASA Crystal was a bit too feisty at times but seemed at her best when caring for her family or dog.The drama between Crystal and her family felt developed and focused than the romance with Larry Love scenes were kept offscreen and behind closed doors which would appeal to sweet romance fans looking for some good ole fashioned romance although there s a good amount of witty sexual innuendo and banter between the hero and heroine I wish there was a bit chemistry developed between Crystal and Larry and perhaps it could have had the chance in a longer story I felt kinda like Larry did every time they kept getting interrupted Despite these minor flaws, I enjoyed reading their story as well as seeing how Crystal came into her own as a person and within her own family The niece and nephew were too cute
