In this book the author sets out to prove the links between the Maya, the Egyptian culture and the secrets of the Knights Templar His theories aim to connect the Mayan Lord Pacal and the Egyptian boy king Tutankhamun through decoding artefacts, images, and monuments in terms of numbers and measurements There are also many other links, too detailed to adequately describe in a review This is a very simple overview of an incredibly complex theory The book could have been divided into three extremely interesting examinations of three fascinating periods of history However, the author has a theory which, unless one accepts the premise, renders the book unbelievable This theory is the world was visited by five super gods in the forms of Lord Krishna, Tutankhamun, Buddha, Jesus, and Lord Pacal Unless one accepts the author s theory about these spiritual leaders being linked, and effectively being reincarnations of the one god, then the book does not have much meaning While I enjoyed the fantastic level of research into the Egyptians, the Mayans, and the Knights Templar I cannot accept the author s theory and I felt that at times the obsession with achieving numerical links especially the number 144 000 was contrived and even forced at times However, the degree of research makes the book valuable to interested readers if only for

separate investigations into the mysteries and achievements of two magnificent and advanced cultures I simply cannot accept the quasi religious angle and this has dimmed my enthusiasm for the contents.

Well it s interesting and still worth the read Lots of recurrent numbers involved describing the secret codes of ancient Egypt Maya which, a thousand years later, were decoded again in The Bible But there is no secret that the world doesn t know about already at least in this book And Tutankhamen didn t die of murder, thanks to the new technology He actually suffered from many diseases as a product of incest One particularly that might have led to his early demise was the complication from epilepsy DNA also proved that he is indeed the son of Akhenaten.

Excellent Book, Excellent Plates and graphicsSome tricky reading for me, anywaysWent right in to another of Mr Cotterell s books Seems the best approach for me is to read and reread the Appendixs first, study the plates and diagrams then read the text.Really look forward to rereading his books, then I could say or comment with clarity, I could comment now but will refrain.Happy reading to all The Tutankhamun Prophecies The Sacred Secret of the Maya, Egyptians, and Freemasons by Maurice CotterellMy rating 5 of 5 starsExcellent Book, Excellent Plates and graphicsSome tricky reading for me, anywaysWent right in to another of Mr Cotterell s books Seems the best approach for me is to read and reread the Appendixs first, study the plates and diagrams then read the text.Really look forward to rereading his books, then I could say or comment with clarity, I could comment now but will refrain.Happy reading to all.View all my reviews
