This is a very interesting book on the Confederacy Secret Service, its members and reasonings It talks much about the people and events leading up the attack on New York city that the attack itself which leaves you to wonder if it had gone as planned would things after that point in the war be any different. This is really 3.5 stars and part of the lower rating is because of the galley copy I read was a little rough. I enjoyed this story and the way the author told the story through almost bullet points of moments in history I want to read of the authors work to get a better idea of his overall style and point of view My only really complaint is with the ending It just comes to a screeching halt with a question that leaves the reader with nowhere to go Not cool. Johnson takes us through a meticulous account of the Confederate plot to burn New York, and the wider story of Confederate underground operations He includes an analysis of why the arson plot failed, and exactly how they SHOULD have done it I was compelled to ask What if a time traveller from American Will Break The Guns of the South reads this and takes it back to 1864 Should have been an article. During the American Civil War following the murder of the unarmed Confederate General John Hunt Morgan by Union soldiers, a planned series of arson attacks were planned on Northern cities to include New York City Besides an investigation into the plot, this work also gives a short biography of Morgan and a brief history of slavery in the United States with emphasis on the relationship between Southern planters and New York business Here we have a look at a little written about event of the Civil War. New York City, November
