Midnight Mavericks by Gene Gregorits Reports from the underground www.fabpress.com This book covers a lot of the artists covered in the No Wave book but this time it is in the form of in depth interviews from Gene s fanzine days with Sex Guts. Gene s basic mission is to interview all his heroes be they musicians like Steve Wynn and Chris D or cartoonists like Stephen R Bissette or Mike Diana or actors and directors like Rockets Redglare or Abel Ferrara, Gene likes to try to get to the nitty gritty and does a lot of the time in speaking to several of the last people to see Sid and Nancy alive you get a good idea of how screwed that whole scene was Gene manages to talk to Jamie Hince of The Kills before notoriety shot him to tabloid infamy as Kate Moss current boyfriend and the Cd that comes with the book has rare and unreleased stuff on it by among others The Kills, Steve Wynn, Sturges Nikides, Lydia Lunch and The Flesheaters which makes this a great book to find if you have an interest in any of these artists oh and it is already changing hands online for serious money for a book that only came out in 2007 well worth seeking out a copy.
